

Companies

Monday, 17 September 2007

I helped in setting up a few companies as i am really interested in today's business sector!

They are:

- WEB Development and Hosting Ltd (WEBDHL)

Founded by myself as a limited company based in Mauritius and offering Web services such as hosting, web design, email etc etc. Has already been registered at the Companies Division and currently in full operation. Marketing and advertising will be starting very soon when all the final preparations have been done.

Website: <http://www.webdhl.com>

- Breivhartz - The Organisation

Founded by a friend of mine, Neermal, this company is an umbrella to a large number of sub-companies. The first one to go live is "BreivHartz Adventures", a company that sets the standard in Outdoor activities, Outings, Excursions!

Website: <http://www.breivhartz.org>

- Shipmodels (Mauritius) Ltd

To be launched very soon, its a company that deals in selling Ship Models to any customer and providing a worldwide service. Being one of the Directors of the company, i will make sure that this company sails off very quickly. There are a few more that i can't list here due to restrictions imposed by the business owner.
