

Web Design

Monday, 17 September 2007

All websites that i personally develop are Joomla! based. I have been supporting Open-Source softwares for quite a while now and they are now my favorites. After development, they are all hosted on my own servers located in NOCs based in the US.

Do you wanna some hosting space? Better than the other paid ones available? Drop me an email and you can get a great deal.

- TheMultiShop.com - Your Online Store

My latest work is an E-Commerce portal, own by WIC Systems Ltd, where you will find various items such as Home & Decor, Electronic Appliances, Gaming Zone, Desktop PCs, Laptops, Netbooks, Radio Controlled Products... More products are being added on a daily basis.

- Rawan.org - Your Local News Portal (Currently Offline)

This website has been developed by myself using modules created during University courses etc. So i said, why not try them online!

Link: <http://www.rawan.org>

- WEB Development and Hosting Ltd (WEBDHL)

This website has been developed by myself and currently an ecommerce website seling web hosting services. Currently available are Web Applications, Web Design, Web hosting accounts for individuals to large enterprises as well as VPS, Colocation and Dedicated Servers. The company is incorporated in Mauritius.
